Emerge Integrative Medicine believes everyone deserves to feel their best and this starts from within. Often times we turn to temporary relief to mask our symptoms like fatigue, irritability, night sweats, insomnia, low libido, etc. We are given over-the-counter supplements or synthetic medications that mostly lead to bigger issues. True health and overall wellbeing starts from within and we are here to offer you all natural solutions. Let us guide you on your wellness journey to find real, life changing solutions to your symptoms. Don't waste another minute not living your best life!

Wellness Consultations

Our wellness consults allow our practitioner to meet with you to discuss your symptoms and design a treatment plan tailored to your needs so you can get back to living your best life!

Weight Loss Therapy

Let us work with you to determine the cause of your inability to lose weight. Each strategy we use is different & designed to result in the most optimal weight-loss for you. This can be achieved through supplements and/or prescription medication such as Contrave, Saxenda, Suppress, Qysmia and Wegovy.

Body Composition Therapy

Did you know you can improve your body composition using peptides? Peptides are naturally occurring biological molecules that are found in all living organisms and play a key role in all manners of biological activity. Many health and cosmetic products contain different peptides for their potential anti-aging, anti-inflammatory, and muscle-building properties.

Sexual Health Therapy

Let's discuss your symptoms to discover what is causing your sexual dysfunction. Our practitioner will tailor a treatment plan based on your specific needs utilizing a wide range of resources including, prescription medications, in-depth lab panels and early detection of disease.

Hair Loss Therapy

PRP (platelet-rich plasma) therapy for hair loss is a three-step medical treatment in which a person's blood is drawn, processed, and then injected into the scalp. PRP injections are known to trigger natural hair growth and maintain it by increasing blood supply to the hair follicle while increasing the thickness of the hair shaft.
