## Halo

**Area of concern:** A hybrid fractional laser that is both non-ablative and ablative. It reduces the appearance of fine lines and wrinkles, pores, and evens pigmentation.

**How often:** Usually only 1-2 treatments are needed. It can be combined with BBL and can be retreated in 6 weeks.

**Downtime:** Up to 6 days - bronzing of the skin, redness, sandy texture to the skin, and swelling are expected. A sunburn like feel will last up to two hours. Minimal aftercare needed - Mild cleanser, moisturizer, & sunscreen.

**Things to remember:** No sun 4 weeks prior to treatment. Stop using retinols & AHA's 3-4 days prior to treatment.

## BBL

**Area of concern:** Broadband light therapy. Treats hyperpigmentation, redness, and broken capillaries. Helps to stimulate collagen to improve laxity and firmness. Can treat all over the body.

**How often:** Usually 3 treatments every 4 weeks, then maintenance 2 to 3 times per year

**Downtime:** Slight redness, warmth to the skin, & darkening spots are normal post treatment. No exfoliating until brown spots are coming off on their own. Mild cleanser, moisturizer, and sunscreen.

**Things to remember:** No sun 4 weeks prior to treatment. Stop retinol, AHA's or similar products 1 week prior to treatment. Can take up to 1-2 weeks for total healing.

## Moxi

**Area of concern:** Any skin type, melasma/uneven skin tone/texture

**How often:** 3-4 treatments, 4 weeks apart

**Downtime:** 5-7 days mends depending on individual healing

**Things to remember:** No retinols or AHA's 3-4 days prior to treatment. No exfoliating after treatment, wear SPF 50 or higher.

## FotoFacial (IPL)

**Area of concern:** Hyperpigmentation and redness

**How often:** Every 4 weeks

**Downtime:** None; spots will get darker 1-2 weeks after treatment and, will flake off. Wear sunscreen.

**Things to remember:** No exfoliating, no sun exposure 4 weeks pre/post treatment. No retinols or AHA's 3-4 days prior to treatment.

## MicroLaser Peel

**Area of concern:** Resurfacing; texture

**How often:** Every 4 weeks

**Downtime:** 4-5 days; feels like a sunburn & then skin will tighten with possible peeling 2nd-3rd day. Wear sunscreen.

**Things to remember:** No exfoliating, no sun exposure 4 weeks pre/post treatment. No retinols or AHA's 3-4 days prior to treatment.

### Did you know?

Based on the laser treatment you receive and the results you desire, we typically recommend one treatment for every decade of life.

## Laser Vein

**Area of concern:** Face and Body - Legs

**How often:** 3-4 treatments, every 8 weeks

**Downtime:** May have bruising, avoid sun exposure at least 2 weeks post.

**Things to remember:** No sun exposure 2 weeks pre or post. Must not have a built tan when treated. No retinols or AHA's 3-4 days prior to treatment.

## Bright Eye Sublative

**Area of concern:** Fine lines & wrinkles (crows feet)

**How often:** Typically 3 treatments, every 2 weeks

**Downtime:** 1-2 days of swelling & redness, 4-5 days of rough texture. Wear sunscreen.

**Things to remember:** No retinols or AHA's 3-4 days prior to treatment. Takes 3 months after last treatment to see final results. Suitable for all skin types.

## Laser Hair Reduction

**How often:** Every 4 - 8 weeks depending on the area

**Downtime:** Very little to none, may experience redness. Wear sunscreen.

**Things to remember:** Shave the day of treatment. No waxing. Cannot be tan, self-tan, or have spray tan. Hormones can cause new growth after full treatments (Example: pregnancy). No retinols or AHA's 3-4 days prior to treatment.
