## LASER & THERMAL ENERGY TREATMENTS

SOUTH TULSA

## LASER HAIR REMOVAL

Say goodbye to unwanted hair and hello to smooth, silky skin with our advanced laser hair removal. This service is safe, effective, and tailored just for you.

*Things to remember: Shave area day of treatment. No waxing or plucking 4 weeks prior. Cannot have sun tan or sunless tan for 2-4 weeks prior. Hormones can cause new follicle growth.*

## FOTOFACIAL

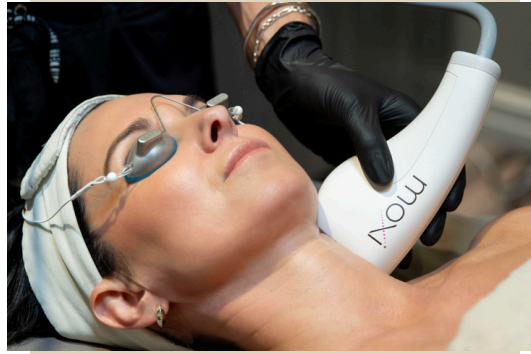

Experience relief from sun damage and uneven skin tone with the help of our FotoFacial device.

*Things to remember: No exfoliation or actives 1 week prior. No sun exposure 4 weeks pre/post treatment. Spots will darken 1-2 weeks post treatment before flaking off.*

## SCITON MICROLASER PEEL

Embrace radiant and youthful skin using the Sciton MicroLaser Peel. This service targets texture, pore size, pigment, and fine lines/wrinkles by encouraging cell turnover similar to a deep chemical peel.

*Things to remember: No exfoliation or actives 1 week prior. No sun exposure 4 weeks pre/post treatment. Inflammation, discomfort, redness, and pinpoint bleeding are common. Peeling may occur starting on day 2-3 post. This service is commonly part of the Sciton StaX.*

## SCITON MOXI

Designed for all skin types, this innovative treatment targets pigment and textural concerns to reveal your skin's true brilliance. This treatment is also beneficial for melasma.

*Things to remember: No exfoliation or actives 1 week prior. Skin texture is affected for up to 7 days post treatment. Inflammation, discomfort and redness are expected. This service is commonly part of the Sciton StaX.*

## SCITON BBL (BroadBand Light)

Unlock your skin's true potential with Sciton BBL. This cutting-edge therapy uses advanced light technology to promote collagen production, minimize sun damage, combat acne, and reduce redness.

*Things to remember: No exfoliation or actives 1 week prior. No sun exposure 4 weeks pre/post treatment. Pigment will darken 1-2 weeks post treatment before flaking off. This service is commonly part of the Sciton StaX.*

### Did you know?

The collagen stimulation obtained from all of our specialty laser treatments continues to improve for up to 12 weeks.

## SCITON HALO

Discover the benefits of this ultimate hybrid laser treatment that combines ablative and non-ablative technologies. Target sun damage, uneven skin texture and tone, and fine lines/wrinkles.

*Things to remember: No exfoliation or actives 1 week prior. No sun exposure 4 weeks pre/post treatment. Inflammation, discomfort and redness are expected. This service is commonly part of the Sciton StaX.*

## SCITON PROFRACTIONAL

Transform your skin with the Sciton ProFractional treatment. This laser service helps to diminish signs of fine to moderate lines and wrinkles, peri-oral rhytids, scars, and sun damage.

*Things to remember: No exfoliation or actives 1 week prior. No sun exposure 4 weeks pre/8 weeks post treatment. Inflammation, discomfort, redness, and pinpoint bleeding are expected end points. May require pretreatment routine 4 weeks prior. This service is commonly part of the Sciton StaX.*

## CO2RE

Elevate your skincare routine with the Candela CO2 laser treatment. This device utilizes fractional CO2 laser energy to rejuvenate the skin and combat fine to moderate wrinkles, scars, and sun damage.

*Things to remember: No exfoliation or actives 1 week prior. No sun exposure 4 weeks pre/12 weeks post treatment. Inflammation, discomfort, redness, and pinpoint bleeding are expected end points. May require pretreatment routine 4 weeks prior.*
